# CONSTRUCTION FORT
## INSTRUCTIONS

## CONSTRUCTION FORT PARTS

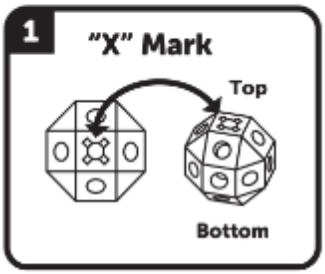
**14 Blue Connectors**

**49 Black Poles**

**14 Green Connectors**

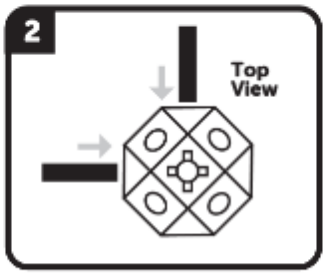
## USING THE CONSTRUCTION FORT PARTS

**1**



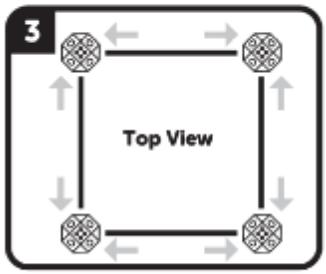
Look on the connector to find the "+" for the top and the bottom of the connector.

**2**



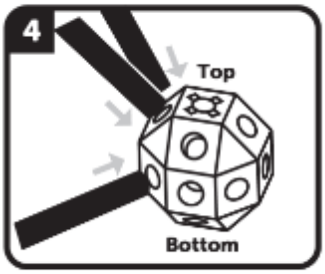
If you want to build a structure with angles you will need to create a solid base. Line up the first 2 poles as shown in the drawing.

**3**



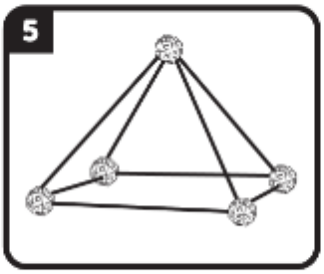
To create a square base for your structure attach connectors to the first poles and add another pole to another connector lining it up as shown in #2.

**4**



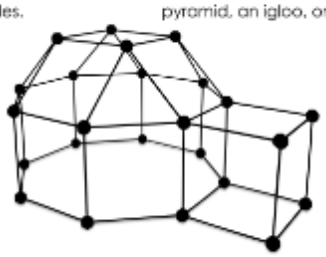
Once you have a base (whether it is square or has many sides) you can start adding poles to create angles. Make sure your base is created with the top and bottom "+" in the correct place.

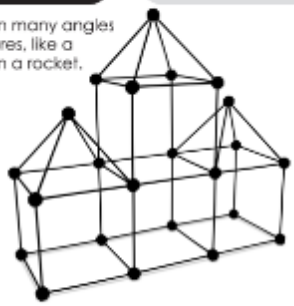
**5**



Now you can add poles in many angles to create different structures, like a pyramid, an igloo, or even a rocket.

**NOW THAT YOU KNOW THE BASICS, YOU CAN NOW BUILD CUSTOM FORTS, CASTLES & MORE**





**INDOOR USE ONLY / USO DE INTERIOR SOLAMENTE**
